

We have created a new and simple way for faculty and students to share lynda.com course links with other people at your school. These instructions show how to copy and email links that will take your users directly to a course page, or help them log in to your school portal and then go to a course page.

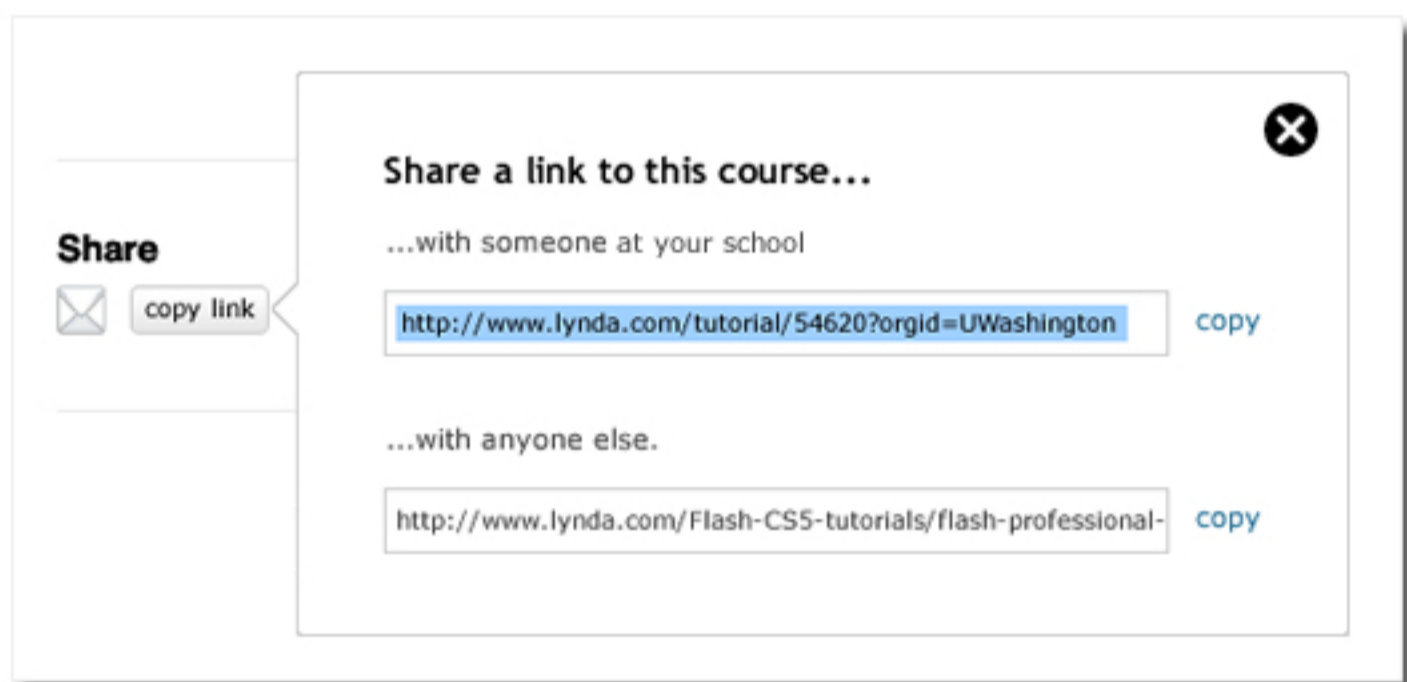

If users are not logged in, these links take them to your school's portal to log in, and then automatically to the course pages on lynda.com. If users are already logged in to your portal, the links take them directly to the course pages.

Choose a way to share

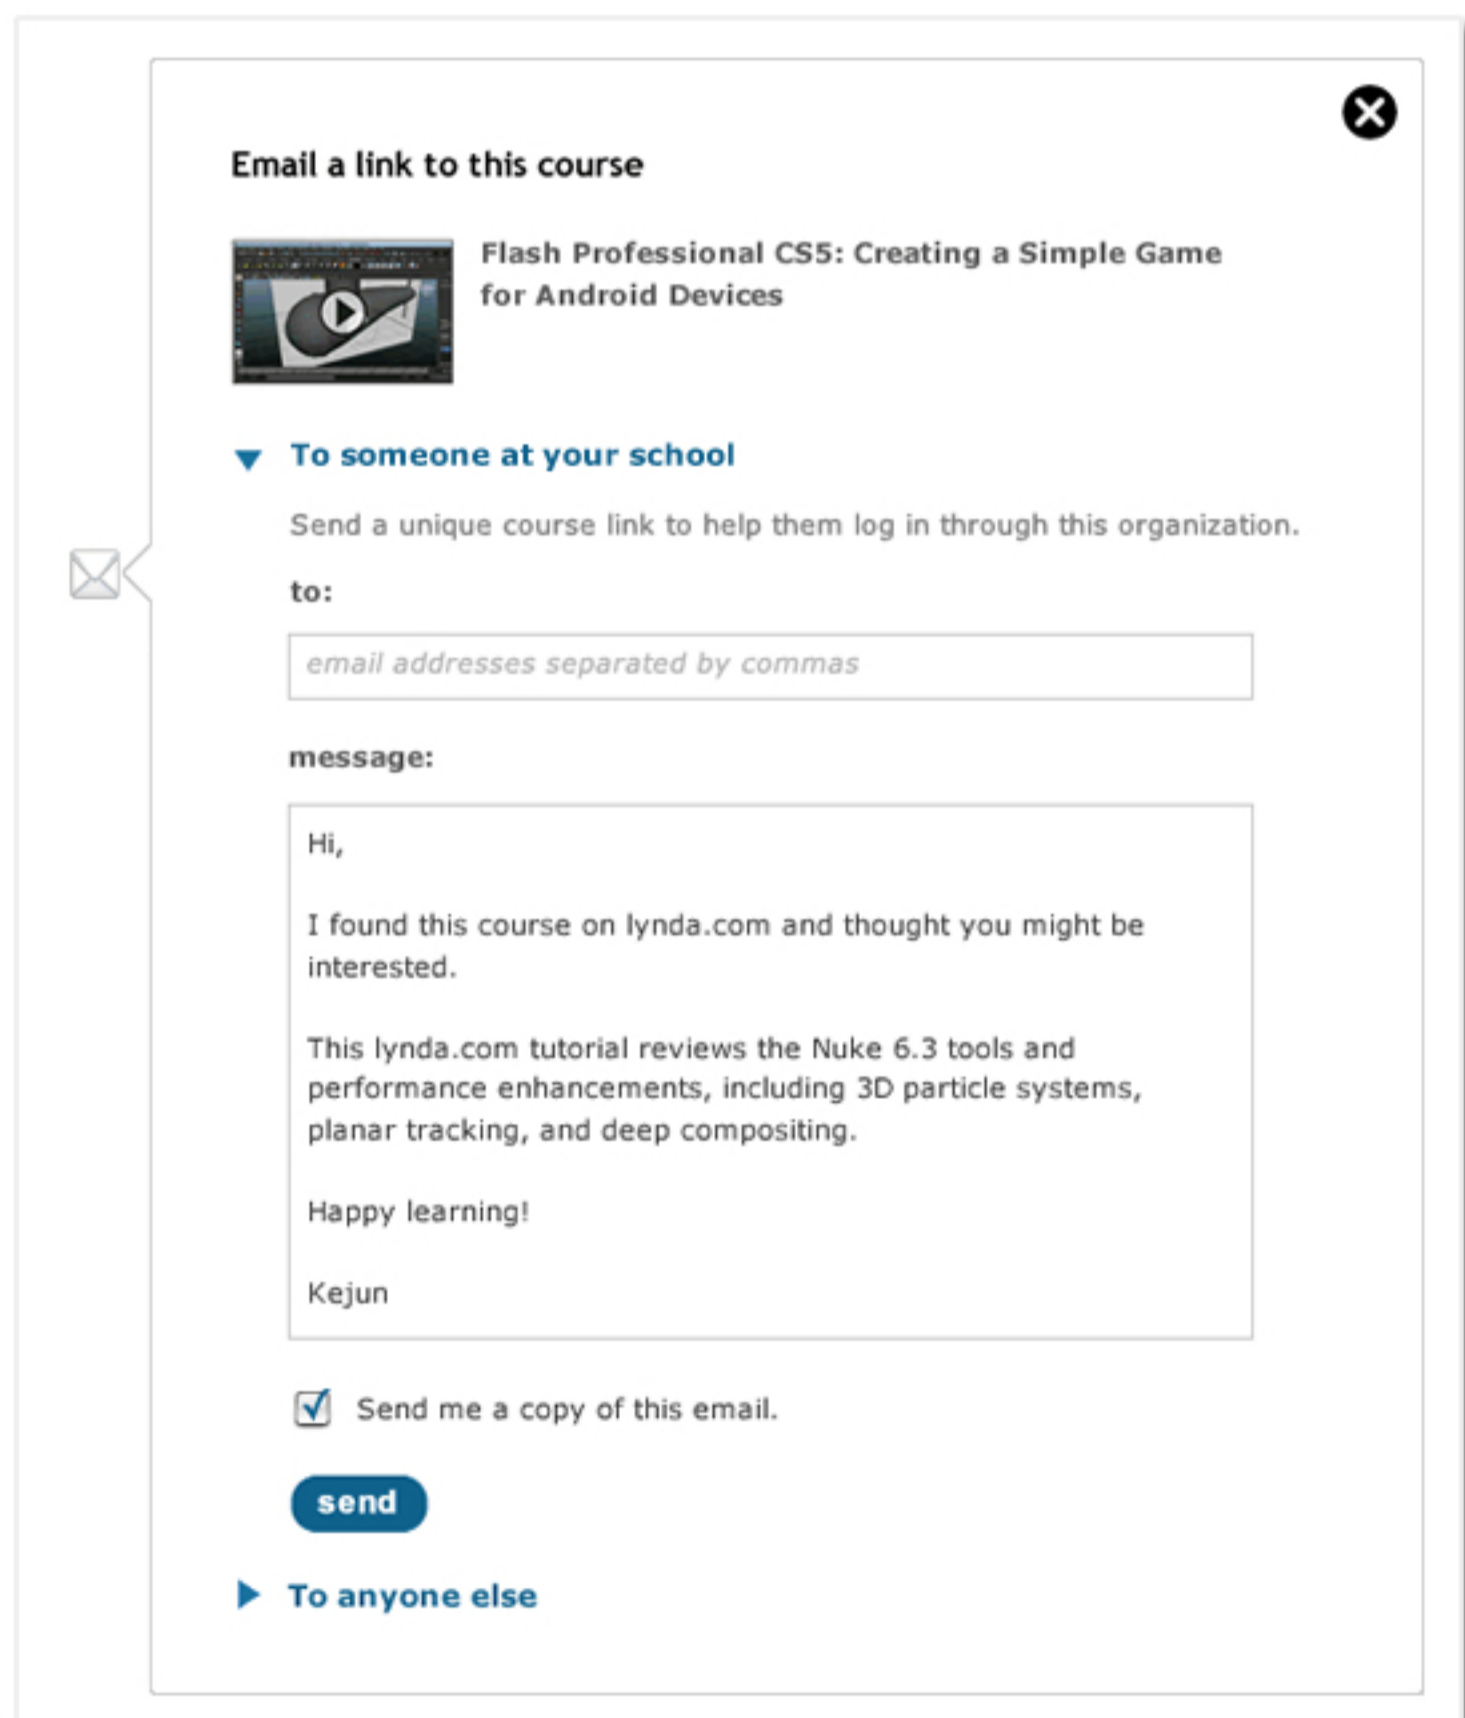

Click the **email** icon or **copy link** button to generate school-specific links.

Copy a link

Simply click **copy link** on a course page to generate the school-specific link to that course, and then click **copy** to grab the link. Paste these course links into a syllabus or integrate them into your LMS.

Or email a link

Email course links by clicking the **email** icon and entering the recipients' addresses.

Our Client Services team is always here to help with any questions. Feel free to contact us at clientservices@lynda.com or 1 (888) 335-9632.

Happy learning,

lynda.com Client Services team
